

Youssef Bouayez

AI Solutions Engineer / SaaS Builder

✉ youssefbouyez2@gmail.com | ☎ +212 700 768 895 | 📍 Tangier, Morocco

Profile

AI & Full Stack Engineer with experience building SaaS platforms, AI-powered applications, automation workflows and cloud infrastructure.

Experienced with Symfony, Laravel, Next.js, React, PostgreSQL, Docker, AWS and modern AI tools.

Built multi-tenant SaaS systems, AI reception solutions, Shopify automation tools and cloud-native applications from concept to deployment.

EXPERIENCE

1. AI Reception Platform (Smart Reception)

Founder & Lead Engineer | 2026 - Present

- Built AI-powered voice reception system for store, events and businesses.
- Integrated speech-to-text and text-to-speech pipelines.
- Designed conversational AI workflows.
- Developed multilingual customer interaction system.
- Created kiosk-ready architecture.
- Built cloud deployment and monitoring infrastructure.

2. Shopify Automation Assistant (ShopPilot)

Founder & Lead Engineer | 2026 - Present

- Developed AI-driven shop assistant to enhance customer engagement.
- Implemented Shopify integration with real-time public page display.
- Engineered conversational interface for automated product inquiries.
- Built RAG workflows using Node.js, TypeScript, and n8n.
- Managed vector data synchronization with Pinecone database.

3. MULTI-TENANT MEDICAL SAAS PLATFORM

Full Stack Engineer & Founder | 2025

- Architected multi-tenant SaaS system with database-level tenant isolation.
- Implemented automated subdomain provisioning and Nginx reverse proxy.
- Developed role-based access control (RBAC) for diverse clinical staff.
- Integrated real-time appointment scheduling and 2FA security.
- Deployed containerized stack using Docker, Symfony (PHP), and React.

Education

WEB DEVELOPMENT TRAINING (BOOTCAMP MODE)

DIGITALSOLIDARITYCENTER(SOLICODE) | 2022-2023

PCAP - PYTHON CERTIFIED ASSOCIATE PROGRAMMER

CISCONETWORKINGACADEMY | FEBRUARY2023

BACCALAUREATE IN PHYSICAL SCIENCES

HIGHSCHOOLMEHDIELMANJRA | 2021-2022

Skills

- **Languages & Frameworks:** PHP (Symfony, Laravel), TypeScript, React (Next.js, Nuxt 3), Node.js.
- **AI & Automation:** OpenAI APIs, AI Agents, Prompt Engineering, RAG Systems, Voice AI, Agent Orchestration, MCP, Workflow Automation (n8n).
- **SEO & Digital Growth:** Technical SEO, On-Page SEO, Google Search Console, Performance Optimization.
- **Cloud & DevOps:** AWS, Hetzner, Hostinger, Coolify, Docker, PM2, Nginx, SSL Management, Linux Administration.
- **Engineering Leadership:** Agile/Scrum, technical team mentorship, architecture design, and project management.

Technical Interests

- **AI Integration & Automation:** Specializing in building intelligent, automated workflows and voice-driven applications.
- **Full-Cycle Engineering:** Dedicated to end-to-end product development, from initial architecture design to cloud deployment and monitoring.
- **Strategic Self-Learning:** Rapidly adopting and mastering modern technology stacks (e.g., Nuxt 3, TypeScript, n8n) to solve complex business problems.
- **Engineering Leadership:** Experienced in leading technical teams, managing development lifecycles, and making critical architectural decisions for scalable SaaS solutions.

Languages

- **Arabic:** Native
- **English:** Working proficiency
- **French:** Basic proficiency
