

Youssef Bouayez

FULL STACK ENGINEER (SAAS & DEVOPS)

✉ youssefbouyez2@gmail.com | ☎ +212 700 768 895 | 📍 Tangier, Morocco

Profile

Full Stack Engineer with 2+ years of experience designing and delivering multi-tenant SaaS platforms. Strong background in Symfony, Laravel, React, React Native, and AWS, with hands-on experience in Dockerized deployments, Nginx reverse proxy, subdomain routing, and system architecture. Comfortable leading technical decisions and building products end-to-end.

EXPERIENCE

1. FREELANCE FULL-STACK DEVELOPER

REMOTE | JANUARY 2024 – PRESENT

- Building custom web and mobile applications for international and local clients
- Developed agency management system with delivery tracking and technician dispatch
- Created Chrome extensions and WordPress plugins for client automation
- Implemented real-time delivery tracking using Firebase and geolocation
- Built SaaS solutions for UK-based clients with modern frameworks
- Delivered landing pages and multi-page websites for product launches
- Tech Stack: Vue.js, React Native, Firebase, WordPress, Chrome APIs

2. MULTI-TENANT MEDICAL SAAS PLATFORM

FULL STACK ENGINEER & FOUNDER (PERSONAL PROJECT)

SELF-INITIATED | 2025

- Designed and built a multi-tenant SaaS architecture from scratch with database-level tenant isolation
- Implemented automatic subdomain provisioning per client using Nginx reverse proxy
- Architected role-based access control (RBAC) system for doctors, nurses, and reception staff
- Developed online appointment scheduling with real-time availability
- Integrated two-factor authentication (2FA) for enhanced security
- Dockerized entire application stack (backend, frontend, database)
- Created complete system architecture and database schema diagrams
- Led all technical decisions throughout the development lifecycle
- Tech Stack: Symfony (PHP), React, MySQL, Docker, Nginx, AWS

3. CLOUD DEVELOPER

YOUR AWS | MAY 2024 – JULY 2024

- Architected and deployed cloud infrastructure using AWS services (EC2, S3, Lambda)
- Implemented domain management and SSL configuration for secure HTTPS
- Built automated security configurations and access control policies
- Optimized application performance through cloud resource management
- Provided technical support for cloud-related issues and infrastructure
- Tech Stack: AWS (EC2, S3, Lambda, Route 53), Docker, Linux

EXPERIENCE

4. FULL-STACK WEB DEVELOPER

DIGIEVENTS | MAY 2023 – APRIL 2024 | REMOTE

- Developed mobile application for event access management and QR code scanning
- Built real-time event tracking system with participant access control
- Implemented barcode scanning authentication for seamless event check-in
- Integrated with multi-tenant event management platform to display attendee permissions
- Worked in partnership with Compact Event (leading Moroccan event agency)
- Collaborated remotely with senior engineer on platform architecture
- Tech Stack: React Native, QR/Barcode scanning, REST APIs

Education

WEB DEVELOPMENT TRAINING (BOOTCAMP MODE)

DIGITAL SOLIDARITY CENTER (SOLICODE) | 2022 - 2023

PCAP – PYTHON CERTIFIED ASSOCIATE PROGRAMMER

CISCO NETWORKING ACADEMY | FEBRUARY 2023

BACCALAUREATE IN PHYSICAL SCIENCES

HIGH SCHOOL MEHDI EL MANJRA | 2021 - 2022

Skills

- Backend: Symfony, Laravel, PHP, REST APIs
- Frontend: Next, React, Vue, Nuxt
- Mobile: React Native (Expo)
- DevOps & Cloud: AWS (EC2, S3, Lambda), Docker, Nginx
- Architecture: Multi-tenancy, RBAC, SaaS platforms
- Tools: Git, Figma, Diagrams

Technical Interests

- Building scalable cloud-native applications and architectures
- Multi-tenant SaaS platforms with complex role-based access control
- Cross-platform mobile development (React Native, Expo)
- DevOps practices: Docker, containerization, and automated deployments
- Exploring emerging technologies in web and mobile development
- Microservices architecture and real-time data processing

Languages

- Arabic: Native
- English: Working proficiency
- French: Basic proficiency
